Profile

Data Science undergraduate student with experience in financial analysis, data quality assurance, and automation. Skilled in Python, SQL, and Excel for building dashboards, analyzing KPIs, and optimizing data-driven processes. Interested in applied data science, analytics, and machine learning in business contexts.

Work Experience

Badak Soluciones S.A. de C.V. Remote
Test Engineer December 2025 – April 2026

Test Engineer focused on ensuring data integrity and system reliability.

- Ensured data integrity across digital platforms using advanced SQL queries in Palantir Foundry.
- Identified and documented critical system bugs in collaboration with development teams.
- Improved QA processes to meet security and accuracy standards.

Santory Internacional S.A. de C.V. Mexico City, Mexico
Financial Planning Intern June - August 2025

Internship committed to financial decisions based on supported data.

- Developed interactive Excel dashboards connected to SQL databases to monitor financial KPIs and employee turnover metrics.
- Automated report generation processes, reducing monthly reporting time by approximately 30%.
- Analyzed budget variances and identified significant deviations from forecasts.

Education

Universidad Nacional Autónoma de México (UNAM) Mexico, CDMX
Bachelor of Science in Data Science - GPA: 3.8 / 4.0 2023 – Expected 2027

Technical skills

Programming: Python, R (basic)

Data & Analytics: SQL, Machine Learning, KPI analysis, data visualization

Tools: Microsoft Excel, Palantir Foundry, Git, Jira, Altair AI Studio

Languages: Spanish (Native), English (B2)
